DETAILED ACTION

1. Claims 1-49 are pending in this communication filed 03/30/01.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-16, 47, and 24-39, drawn to providing payment services, classified in class 705, subclass 35.
- II. Claims 17, 40, and 48, drawn to making a payment on behalf of a user, classified in class 705, subclass 39.
- III. Claims 18-23, 41-46 and 49, drawn to enrollment in an electronic payment system, classified in class 705, subclass 40.

Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because Group I has providing payment services. The subcombination has separate utility such as making a payment on the behalf of a user.

Inventions Group I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct if they do not overlap in scope and are not obvious variants, and if it is shown that at least one subcombination is separately usable. In the instant case, subcombination Group III has

Art Unit: 3624

separate utility such as the enrollment in an electronic payment system and Group I provides the payment services after the user is enrolled in the electronic payment system. See MPEP § 806.05(d).

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
